

# BEN GUERIR

Water is wealth  
not waste

Water is life. Let's save and reuse every drop.

**Save water as  
demand grows**

Every drop you save at home and at work helps keep up with demand.

**Conserve water  
amid scarcity**

Cut non-essential use.

**Choose plants  
that use less water**

Local plants use less water. Water your plants at coolest hours of the day.
